Cambridge SoundWorks Model 88CD Table Radio by Henry Kloss®

Model 88 radios use a unique speaker system that includes a built-in subwoofer to create huge sound—far bigger than seems possible from a radio of its size.

Model 88CD is a wonderful compact AMFMCD audio system for a bedroom, kitchen, office or den. Its auxiliary input can be used to connect a cassette, MP3, MiniDisc player or even a stereo TV. A credit card sized remote is also included.

The Model 88CD is the ultimate alarm clock. It includes a dual alarm system that can be set for two different times, using music, an alarm sound or both.

"The best I've heard." —Stereo Review magazine

"Model 88 is a blockbuster...also a stunning value...formidable indeed." —Audio magazine

The Original Cambridge SoundWorks Model 88 Table Radio by Henry Kloss®

In 1998 Cambridge SoundWorks introduced what many consumers and critics still believe is the best sounding table radio ever made—the Model 88 by Henry Kloss. And now it has an incredible price.

"A table radio to end all table radios...The Model 88's FM tuner is superb, perhaps as good as any receiver's costing up to \$500, maybe even \$1000." —Hartford Courant

Like the Model 88CD, it uses high-performance speakers and amplifiers. Two-thirds of Model 88's cabinet serve as the enclosure for a subwoofer. It reproduces bass with remarkable accuracy and impact. The AMFM tuner outperforms even high-end receivers.

Two sets of stereo inputs and a credit card sized remote control are included.

MusicWorks™ by Cambridge SoundWorks

Finally – small, affordable mini-systems that sound as good as a full-sized system.

If you are looking for the simplicity and compact design of a mini-system, check out the three brand-new Cambridge SoundWorks MusicWorks systems. The MusicWorks Center Section has an AMFM tuner, a single CD player, a multi-function LCD display, digital clock, and a preamp-level output designed to drive powered multimedia loudspeakers. A computer mix input is also included so that you can use MusicWorks with your PC. MusicWorks systems all incorporate a separate subwoofer for room-filling, dynamic sound.

MusicWorks Center Section

If you already have a powered multimedia speaker system, you can get the Cambridge SoundWorks MusicWorks Center Section by itself. AMFM tuner, a single CD player, a multi-function LCD display, digital clock, and a preamp-level output. Four-position preset equalizer, computer mix input.

Model Twelve Transportable Speaker System by Cambridge SoundWorks

Here is a true Cambridge SoundWorks original: The patented Model Twelve transportable speaker system. Inside the hard-shell travel case is a pair of our two-way satellite speakers and a control/input/power module. The case has room to carry any portable audio player – CD, MP3 or cassette. Plug in using the headphone jack, and you have a serious high-performance mobile audio system.

The difference is in the case itself: it doubles as a subwoofer. When in operation, the BassCase® and its built-in powered subwoofer provide incredible bass response.

Dozens of the world's top rock and pop acts love their Model Twelve systems – they travel well and sound amazing. But Model Twelve is not just for rock stars. It is also great for business. Fits easily under airline seats. Add MP3 files to your multimedia presentations and plug in your laptop through the headphone jack. You'll have the best sounding presentations around. And when you get back to the hotel, you'll have a great sounding audio system.

Model Twelve is even 12 volt compatible for those times when all you have is batteries. When it comes to portable audio systems, Model Twelve has no rival.

Patented BassCase subwoofer doubles as a carrying case for the complete system.

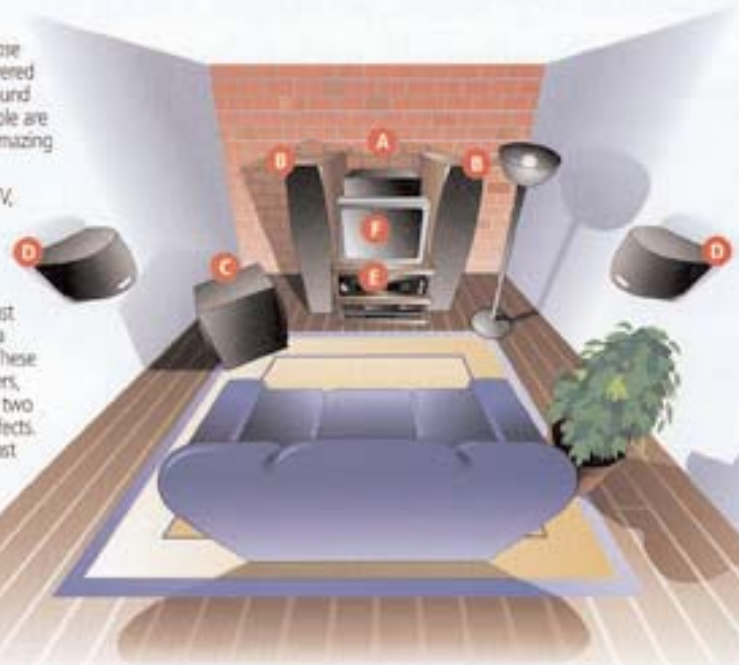

"Model Twelve is unquestionably the finest computer-related sound system we have yet to hear, and its portability makes this Editor's Choice winner that much more attractive." —PC Magazine

Home Theater Made Simple.

It all started in 1977 with *Star Wars* and *Close Encounters of the Third Kind*. People discovered that a great movie is even better with surround sound. Now, more than 23 years later, people are discovering that they can have that same amazing theater experience in their own homes.

Home theater is the combination of a big TV, and a good sound system. These days that means a 27" diagonal or larger TV, a Home Theater receiver, five speakers, a subwoofer and a DVD player. If you've already got a good TV and a stereo VCR, just add one of our Dolby Digital receivers and a speaker package and you're on your way. These systems give you two stereo "main" speakers, a "center" speaker for movie dialogue and two or more "surround" speakers for special effects. Virtually every system we sell includes at least one subwoofer – a speaker that you hide away in a corner that churns out bass you can hear and feel.

The key to surround sound is the surround format. Dolby Pro Logic is the original, Dolby Digital is the current industry standard. We recommend

the Dolby Digital format as a starting point. All DVD movies have a Dolby Digital soundtrack. New formats are emerging, such as DTS-ES and THX Surround EX that add even more rear surround channels. Below we have described each format.

If you want to learn more about home theater, we have several articles on the subject in the HiFi Library at hifi.com.

What Is In A Home Theater?

Using the illustration at left, you can see the different components of a home theater system:

- A Center channel speaker
- B Left and Right main speakers
- C Subwoofer (this can be placed anywhere in the room)
- D Left and Right surround, or rear speakers
- E Home Theater Receiver and DVD player
- F Television

Guide To Surround Formats:

Dolby Digital®

Dolby Digital is the industry standard surround sound audio format. Virtually all DVD movies have a Dolby Digital soundtrack. It features 6 separate channels of audio: left, right, center, left surround, right surround and subwoofer. Sometimes the 6 channels are called 5.1 channels the .1 is the subwoofer channel.

Dolby Pro Logic®

An older surround format, Pro Logic is found on video tapes, TV programs as well as DVDs. Pro Logic divides stereo (2-channel) sound into four surround channels.

Dolby Pro Logic II®

This new and improved version of Pro Logic takes 2-channel stereo recordings and older Dolby Pro Logic recordings and creates a 5.1 channel simulation. The big improvement is that Pro Logic II creates true stereo rear channel signals, where Pro Logic has only a mono rear channel signal. Great feature for those with big collections of movies on video cassette.

DTS®

A 5.1 channel audio format just like Dolby Digital. However it is a format with less compression on the audio tracks, and therefore has a slightly higher audio fidelity. Most of the receivers we sell feature both Dolby Digital and DTS.

THX® Surround EX and DTS-ES

A few receivers we sell can process THX Surround EX and DTS-ES encoded discs. These are 6.1 channel discs, adding a Center Rear channel to the standard 5.1 surround mix. THX Surround EX takes that new seventh channel and splits it into two center rear channels.

Our Best Deal On Dolby Digital Surround Around – Big Sound From A Small Package

This is a great deal on a true Dolby Digital surround system. Our popular, low-profile Ensemble IV Home Theater speaker system features five of our powerful cube speakers and our easy-to-hide compact passive subwoofer. *Consumer's Digest* says, "Ensemble IV sounds better than some systems twice the size and three times the price." Combine that with the JVC RX-6010VBK and you've got a terrific system for small to mid-size rooms. The RX-6010VBK offers a lot for the money: Dolby Digital and DTS decoding and 100 watts per channel power.

"I'm not sure you can do better than the 408 for \$400... Little speakers, big sound, little money—sounds like the perfect combo to us."
—Home Theater magazine on MovieWorks® 408

The Perfect Combination Of Performance And Value

This is one serious home theater system. The MovieWorks 408 system adds the BassCube™ 8 powered subwoofer to the mix. It employs an 8" downward firing speaker and a built-in 50 watt amplifier to truly emphasize the low-end of your favorite music, or add rumble to the soundtrack of your favorite movie. Delivering high-impact bass down to 39 Hz, the BassCube™ 8 easily fits into any room. The five compact cube speakers blend into any environment.

Included is the JVC RX-6010VBK Dolby Digital/DTS receiver, with 100 watts of power for each of the five channels, plenty of inputs and outputs and a remote control.

Save An Extra \$100 On Our Best-Selling Surround Sound System!

The system is built around one of the most popular surround sound speaker systems ever – Cambridge SoundWorks' MovieWorks II 5.1. The two-way main speakers are a shielded version of our famous Ensemble® satellite speakers (that Audio magazine said may be "the best value in the world"). The center channel speaker is a wide-dispersion, high-output shielded design with two 3 1/2" midrange drivers and a tweeter.

The Surround® II 5.1 rear speakers use MultiPole™ technology that lets you switch between diffuse-radiated sound and direct-radiated sound. The Cambridge SoundWorks BassCube 10 powered subwoofer delivers accurate, high-impact bass down to 35Hz. It uses a heavy-duty 10" long-throw woofer and 70 watt amplifier in a surprisingly compact enclosure.

We've matched the speakers with the Sony STR-DE575 receiver which jumps you up to 100 watts x 5 channels, Dolby Digital, DTS, and much more.

The Country's Best Under-\$1000 Home Theater System

This brand-new system is based on our most compact Newton Series™ speakers, combining low-profile styling, incredible performance and a great price.

It starts out with the MC200 two-way speakers as Left and Right mains. Inside rigid cabinets are 4" molded composite drivers and T silk-dome tweeters. For a center channel speaker we use the matched MC300. This speaker uses dual 4" drivers and a 1" tweeter to evenly radiate the all-important center channel audio information, which includes dialog.

These front speakers are matched perfectly with our all new BassCube™ 85 powered subwoofer, which incorporates an 8" driver and a built-in 50 watt amp. Bringing up the rear are the new S200 MultiPole™ wall-mountable surrounds that allow you to switch between bipole and dipole dispersion.

Matched to the speaker system is the Sony STR-DE575 receiver. Dolby Digital and DTS processing is just the beginning. The STR-DE575 offers 100 watts x 5 channels of power and all the inputs and outputs you need.

*"MovieWorks 5.1 definitely delivers the goods; genuinely full-range, legitimately cinematic home theater surround sound...clearly one of the best one-box home theater speaker systems I've heard...outstanding low-bass performance... anyone who seeks excellent performance from an unobtrusive setup should be pleased."
– Stereo Review magazine*

Serious Performance From A Compact System

We think this system compares to competing systems selling for hundreds, or thousands more. And it won't fill up your room with big boxes – just big sound. The two-way main speakers are shielded versions of those in our acclaimed Ensemble® satellites. They have very natural tonal balance and excellent stereo imaging. The high-output CenterStage® center speaker uses two 5 1/4" mid-range speakers and a T tweeter to reproduce movie dialog and centrally located sound accurately in rooms of any size.

The rear speakers are Cambridge SoundWorks™ The Surround 5.1. They use MultiPole technology to switch from diffuse radiation mode (good for most movie soundtracks) to direct radiation mode (good for use with multi-channel music). Home Theater magazine called them "the world's best budget surround speaker." The powered subwoofer is our BassCube™ 12. With a 12" long-throw woofer and a 100 watt RMS amplifier, this system will rock even large rooms, with accurate bass down to 32Hz.

A Super-System That Combines Power, Performance And Style

This brand-new system is based on our most compact Newton Series speakers, combining low-profile styling, incredible performance and a great price. The system starts with the MC200 two-way speakers as Left and Right mains. Inside rigid cabinets are 4" molded composite drivers and T silk-dome tweeters. We use the matched MC300 for a center channel speaker. This speaker uses dual 4" drivers and a 1" tweeter to evenly radiate the all-important center channel audio information, which includes dialog.

These front speakers are matched perfectly with our Newton Series P500 powered subwoofer, which incorporates two 8" drivers and an incredible built-in 500 watt amp delivering bass response down to 24 Hz. It also comes with our exclusive Subwoofer Control Module and bass-level remote. Bringing up the rear are the new S200 MultiPole™ wall-mountable surrounds that allow you to switch between bipole and dipole dispersion.

Matched to the speaker system is the Marantz SR-4200 receiver, one of the most popular receivers we sell. The SR-4200 offers 70 watts x 5 channels of high-current amplification, Dolby Digital and DTS processing and all the inputs and outputs you need including 5.1 inputs for DVD-Audio and SACD.

We Challenge You To Find A Better System For Under \$2000 Anywhere

This system delivers awesome performance – but is small enough to fit into any decor. Across the front are three MC300s, perfectly matched as Left/Center/Right speakers. Each has dual 4" drivers and a T silk-fabric tweeter. Wide range and powerful, they will effortlessly drive the mid- and high-frequencies of the most demanding music or movies. Sound & Vision magazine says they, "sounded full and solid, with a beguiling smoothness."

Backing up the MC300s with incredible lows is the 500 watt, dual 8" driver P500 powered subwoofer. Includes the separate component Subwoofer Control Module and delivers bass response down to 24 Hz. For rear surrounds, the system includes two S300s, our best new three-way MultiPole surround. The S300 allows you to choose between direct-radiating bipole or dipole dispersion settings. The S300s each have a 4" driver, two 2 1/2" drivers and a 1" silk-dome tweeter. Sound & Vision magazine calls them "the star of the show."

Driving the whole system is the Marantz SR-S200 6.1 channel receiver. The SR-S200 has everything you could want including Dolby Digital and Pro Logic II, DTS and DTS-ES 6.1 channel output and 96kHz/24-bit audio processing. The SR-S200 has a huge array of inputs, including 6.1 channel inputs. Also features stereo to surround conversion and pre-programmed remote.

Absolutely Incredible 6.1 Channel Surround Sound

The Newton Theater T300 system steps you up into the incredible world of Newton Series™ towers. Incredible sounding, and a pleasure to look at, T300s are three-way towers with built-in 150 watt powered subwoofers. The amp drives a side-firing 10" molded composite subwoofer driver and a 10" passive radiator. Mid- and high-frequencies are handled by two 4" forward-firing drivers, alongside a silk-fabric tweeter.

Because this is a 6.1 channel surround package – which adds a rear center channel to a standard surround system – we incorporate two of our killer MC300 center channel speakers, each loaded with dual 4" drivers and a 1" tweeter. On the sides we use the best Newton surrounds, the S300 tri-directional MultiPole™ speakers.

All of this is driven by the amazing Marantz SR-7200 receiver. The 7200 decodes virtually every surround format there is, including 6.1-channel DTS-ES. The 7200 provides 105 watts of power to six channels. A full complement of inputs and outputs are included. The 7200 is also multi-room/multi-source capable. This receiver even has low-voltage triggers that can close your drapes or lower your video screen. The LCD learning remote control with macro capabilities completes the package.

For Those Who Must Have The Best: 7.1 Channels of Home Theater Nirvana

Take the top speaker models in the Newton Series, add the extraordinary Onkyo TX-D5989 7.1 channel surround sound receiver, and you have the most enveloping, powerful home theater system you can get for this price.

Up front are the incredible Newton Series T500 towers. Without a doubt, the most powerful, best-sounding and best-looking speakers Cambridge SoundWorks has ever developed. They not only provide flawless mids and highs, they also provide thunderous bass from built-in 300 watt matching powered subwoofers. In the center of the array is our best center channel speaker, the high-output, wide-dispersion MC500.

7.1 channel systems add two extra rear surround channels to the home theater mix. Providing rear channel surround effects are four of our best

surround speakers, the tri-directional MultiPole S300s, with three position switchable dispersion patterns.

The TX-D5989 not only supports every surround format available today, it is also the first receiver to offer true 7.1-channel amplification, true THX Surround EX™ and DTS-ES playback ability and 192kHz/24-bit DACs for all channels. The RS-232C port and the control circuitry have been designed to interface with the most popular whole-house control systems. With a plethora of video inputs you can easily connect all of your components to the TX-D5989 and control them all with the backlit LCD learning remote control.

Newton Series Speakers by Cambridge SoundWorks

Introducing A Radical New Concept
 In High-End Speakers:

Value.

For years there has been a class of loudspeakers that feature exotic components and cabinetry and are assembled with refinement normally reserved for laboratory equipment and musical instruments. Music fanatics have found these speakers to be worth a considerable premium. Prices start at about \$3,000 a pair, and can easily reach \$20,000 or even more.

Then came Newton Series by Cambridge SoundWorks.

The Newton Series of speakers brings the Cambridge SoundWorks factory-direct selling method into this high-end arena. With Newton Series you can enjoy the style, refinement and all-out performance of exotic, world-class speakers at down-to-earth prices.

If you were to dissect the Newton Series speakers, you would find things like silk-fabric tweeters with polymer damping, graphite reinforced polymer midrange and bass drivers, Class D digital amplifiers, real maple and mahogany wood veneers and solid hardwood edge bolsters.

The proof is in the experience. We invite you to try Newton Series speakers in your home, with your favorite music, with your favorite movies. If you don't fall in love with them, return them within 45 days for a full refund. We'll even pay the return freight.* There's virtually no risk.

"I live at the heart of the greatest instrument in the world – the orchestra. The Cambridge SoundWorks T500 speakers deliver sound with such clarity you focus only on the music, not the speakers."

– Jonathan McPhee, Music Director and Principal Conductor, Boston Ballet

Newton Series T500 Tower Speakers by Cambridge SoundWorks

The top-of-the-line is the Newton Series T500. It is a four-way, magnetically-shielded tower speaker with a built-in powered subwoofer. The T500 delivers silky-smooth and warmly accurate musical reproduction, while being simultaneously capable of thunderous dynamics and bass output for movie soundtracks.

The built-in 300 watt Class D subwoofer amplifier powers a 10" molded-composite subwoofer and a 12" passive radiator. The midbass assembly consists of a 6.5" molded-composite driver and a 4" molded-composite midrange. It also comes with a 1" reinforced silk-fabric tweeter with neodymium magnets, speaker level, SUB and LR link connections. The dimensions are 48"H x 8 1/2"W x 19"D (50 1/2"H x 12 3/4"W including feet). Available in blonde maple or mahogany real-wood veneers, or slate finish. All feature removable knit grilles.

Model Six rated "Best Buy."
— A leading consumer advocacy publication

Model Six Bookshelf Speakers by Cambridge SoundWorks

Over 30 years ago, Henry Kloss designed the famous KLH Model Six. Later he created the Cambridge SoundWorks Model Six, a two-way system designed to satisfy serious listeners.

The 8" woofer cone is larger than those usually found in speakers this size, allowing for substantial air movement at low frequencies for accurate extended bass. Model Six's tweeter suspension allows the "long-throw" necessary for music in this range. Available in three vinyl finishes. Dimensions: 18 3/8"H x 11 3/8"W x 7 1/2"D.

"Close Your Eyes, And You'll Swear You're Listening To A Full-Sized Component System."

Cory Greenberg, NBC Correspondent

The Model 88CD Table Radio by Henry Klass delivers rich, natural sound – including great bass – and fits just about anywhere.

Model 88CD
by Henry Klass®

\$349⁹⁹

The Model 88CD adds a CD player and a built-in dual alarm clock to the mix. With two speakers, a high-performance tuner and a built-in powered subwoofer, the Model 88CD continues the tradition of simplicity, elegance and unexcelled sonic quality in a compact design.

Perfect for any kitchen, den or home office. Connect a tape deck, MP3 player, or even a stereo TV to its auxiliary input.

The Model 88CD is also the ultimate alarm clock – with a dual alarm that can be set for two different times.

The Dallas Morning News says it "...blows the dials off the competition."

Purchase the Model 88CD and enjoy it in your own home. If – within 45 days – you don't fall in love with it, return it, no hassles and no questions asked. We'll even pay the return shipping charges. See page 4 for more information.

MusicWorks™ 200

The Best-Sounding Under-\$200 Stereo System We've Ever Heard

If you are looking for the simplicity and compact design of a mini-system, look no further. The MusicWorks 200 system from Cambridge SoundWorks easily outperforms other mini-systems on sound quality and price. *Sound & Vision* says MusicWorks 200 is a "mini-system whose big sound belies its diminutive size and low price tag."

The package combines our MusicWorks Center Section and our amazing SoundWorks® Digital subwoofer/satellite speaker system. The center section offers a CD player, AM/FM stereo tuner, multi-function LCD display, clock, and preamp level output designed to drive powered multimedia speakers. A computer mix input is also included, so you can plug in your PC. See page 5 for more information.
